1.1 million of our residents live in areas among the 20% most deprived in England

1,1 million de nos résidents vivent dans des zones parmi les 20% les plus défavorisés d'Angleterre
...and there is a clear correlation between deprivation and Life Expectancy

...Et il existe une corrélation claire entre la privation et l'espérance de vie

Female Life Expectancy (2015 - 2017) & IMD Average Score (2019)
Male Life Expectancy (2015 - 2017) & IMD Average Score (2019)

…and there is a clear correlation between health, prosperity and inclusive economies

…et il existe une corrélation claire entre la santé, la prospérité et des économies inclusives

"…poor health in some Greater Manchester communities, creating a barrier to work and to progression in work, provides an important explanation for why overall growth has been slow in the last decade. It explains why some communities have been unable to contribute or benefit more."

HEALTH NEEDS TO FEATURE FAR MORE PROMINENTLY IN DISCUSSIONS OF HUMAN CAPITAL, LABOUR MARKET PARTICIPATION, AND PRODUCTIVITY.

GREATER MANCHESTER INDEPENDENT PROSPERITY REVIEW

REVIEWERS' REPORT

March 2019

'*Good health*' is not simply of an absence of illness. It is a positive state influenced by the extent to which individuals in a society are enabled to live healthy and flourishing lives.
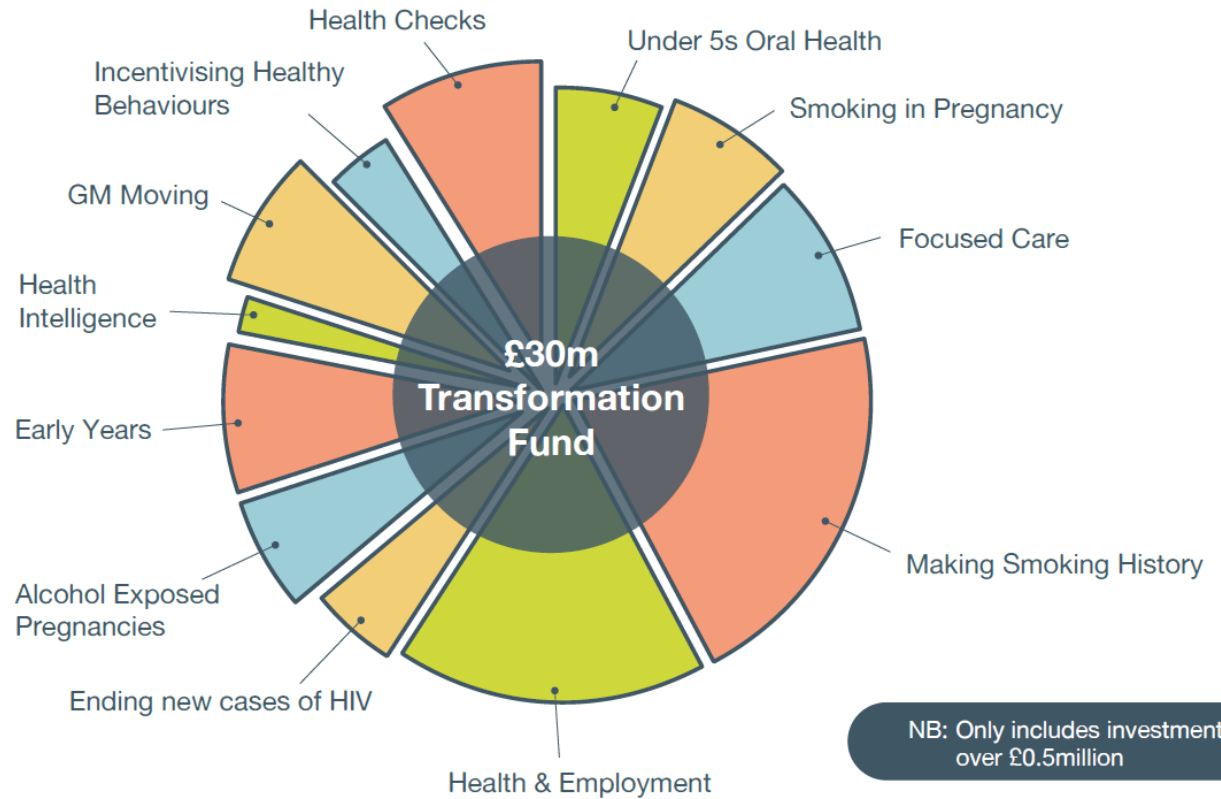

Une bonne santé ne signifie pas simplement une absence de maladie. Il s'agit d'un état positif influencé par la mesure dans laquelle les individus d'une société sont capables de mener une vie saine et florissante.

The strongest influences on people's health are social determinants: the conditions in which people are born, grow, live, work and age including their early years experiences, education, income, quality of housing and employment, and the environment within which they spend their time.

Les influences les plus fortes sur la santé des personnes sont les déterminants sociaux: les conditions dans lesquelles les gens naissent, grandissent, vivent, travaillent et vieillissent, y compris leurs expériences de la petite enfance, l'éducation, le revenu, la qualité du logement et de l'emploi, et l'environnement dans lequel ils passent leur temps.

GOING FURTHER, FASTER

POUR ALLER PLUS LOIN, PLUS VITE

3 OBJECTIVES:

- Our Population's Health
- Building a Sustainable System
- Unlocking our economic potential

"Our big ambition is for our population to both demand better health and have the confidence to change their own lives. To achieve this, we do not want to be restrained by the incremental changes made by small-scale public health projects. And thanks to the range of levers provided by devolution, we do not need to be. Greater Manchester can put health at the heart of every policy and strategy across the whole of the public service."

GM Model for Public Services

First Marmot city-region

GM Public Service White Paper

A system where the overlaps are shaped to improve health **and** stimulate inclusive economic growth

Goal	Description of the Goal
Healthy GM	A place where all policy and strategy decisions consider the health of the population and the impact on future generations. A society in which people's physical and mental wellbeing is maximised and in which the health impact of choices and behaviours are understood.
Fair GM	A city-region which strives to close the inequalities gap and that enables people to fulfil their potential no matter what their background or circumstances. A place where decisions are proactively taken which reduce inequalities, are grounded in the principles and 'proportionate universalism' and where we seen the greatest improvements amongst those with the worst outcomes.
Cohesive GM	Attractive, cohesive, engaged, safe and well-connected communities where all citizens live healthy and prosperous lives which enable them to meet their potential. Full implementation of the GM model for public services providing a high-quality 'safety net' of integrated public services for those with the greatest level of need or those at risk of harm.
Vibrant GM	A society that values and celebrates diversity – building upon our unique heritage and embracing future opportunities. A place where physical activity is built into the everyday life of local people, and enabled through innovative design. A population where access to culture and the arts is accessible to all and relevant to everyone.
Sustainable GM	A socially and environmentally responsible place that recognises the climate emergency and takes bold and wide-ranging action to become carbon neutral by 2038. A society which maintains and enhances a biodiverse natural environment with healthy functioning ecosystems that support social, economic and ecological resilience and the capacity to adapt to change (for example climate change). A place where we maximise the Social Value that is generated by services for the public as Anchor Institutions in neighbourhoods and localities.
Prosperous GM	A City Region which promotes inclusive growth within an inclusive economy underpinned by an innovative, productive and low carbon society built upon a healthy, skilled and well-educated population. A high proportion of the population in good work with good employers and where the living wage is the baseline. A place where all people are enable to reach their potential and where all places experience the benefits of growth

POPULATION
HEALTH | Greater Manchester Health
and Social Care Partnership

7 Criteria:

1. Security of work
2. Flexible work
3. Payment of a real living wage
4. Excellent people management
5. A productive & healthy workplace
6. Excellent recruitment practices & progression
7. Workplace engagement & voice
